***Allowable Subject Matter***

1. Claims 1-21 are allowed
2. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not take into account and determine when there are obstructions near the intersection that would prevent communications. The closest prior art discloses relaying information all of the time to prevent sensors from being blocked at intersections but they do not actually determine that there is an obstruction. The prior also does not disclose a first vehicle detecting an intersection and based on that receiving information from vehicles on the intersecting road and transmitting that information to vehicles on the same road as the first vehicle.
